

# THE END OF THE FLUORESCENT LAMP?

From 2023 changes to the **Restriction of Hazardous Substances in Electrical and Electronic Equipment Directive (RoHS)** will impact the placing on the market of fluorescent lamps containing mercury.

**This will effectively ban all T5, T8 and compact fluorescent lamps from sale.** The phased change will occur between February and August 2023 across the EU, with the UK widely expected to follow suit, although at present the government has not confirmed dates for this.

## HOW CAN THORLUX HELP?

**Thorlux Lighting** manufactures a wide range of high-performance, energy-efficient luminaires for a wide variety of applications. When combined with the award-winning SmartScan wireless lighting management system, SmartScan luminaires can deliver **energy savings exceeding 70%** when compared with conventional technology.

# FUNDING OPTIONS

Thorlux offers flexible funding solutions from **Mitsubishi HC Capital UK PLC**, a leading financial services company with over four decades of experience providing innovative finance solutions that help consumers and businesses to grow and prosper. With nearly 1.3 million customers across five business divisions, they

are one of the UK's leading financial service companies. Thorlux Lighting has a Partnership Agreement with Mitsubishi HC Capital UK PLC, which allows for more flexible funding models. These range from simple payment plans to more innovative solutions that include installation and maintenance.

# WHY BUY FROM THORLUX?

Thorlux designs and manufactures a comprehensive range of professional lighting and control systems, including energy-efficient solutions, at its sophisticated facilities in Redditch, Worcestershire. When choosing Thorlux for architectural, commercial, floodlighting, industrial, and hazardous area applications, you can be confident of receiving:

- **Professional, competent advice from a long-established UK company**
- **A choice of lighting and control systems subject to stringent quality control (BS EN ISO 9001:2015)**
- **Excellent customer service and a 5-year warranty**

For over 80 years, Thorlux has manufactured increasingly sophisticated luminaires in the UK. Over the last 20 years, the company has focused on high-technology products, including the development of its first electronic energy-saving lighting control system in the mid-1990s. Huge investment in design and testing facilities has now put Thorlux at the forefront of its market sector. Thorlux luminaires are subject to stringent quality controls, as demonstrated by the company's BS EN ISO 9001:2015 (quality management systems) certification. Additionally, certification of Thorlux to BS EN ISO 14001:2015 (environmental management systems) gives the customer assurance that the company manufactures its products in the most environmentally-friendly manner.
